Quick Overview

Vibration Damper (M/F) 30x20mm M8x8 45 ShA

[More Details](#)

Details

Anti Vibration Bobbins when properly chosen provide a cost effective solution to problems involving vibration, shock and noise control – the rubber buffer can be used in shear/compression or both. However, it must be noted that they do not provide a fail-safe solution.

For fail safe mounts, please refer to the KPR and KMR range of anti-vibration rubber mounts from Polymax.

Available in a large range of sizes, thread lengths and material, the cylindrical vibration damper is a classic all round solution.

Additional Information

Material	Natural Rubber (NR)
Diameter (mm)	30
Height (mm)	20.0000
Hardness (Shore A)	45
Maximum Load. Compression (Kg)	32.45
Maximum Shear Load (Kg)	9.5
Thread Size	M8
Thread Length (mm)	8
Metal Type	Mild Steel

*Dimensions can vary, they are typical only.
