

For those that experience the white/grey grass problem.

**It has to do with the CSP settings and there are two solutions:**

(CM = Content Manager)

1 YOU DO NOT WANT SEASONAL ADJUSTMENTS (like me and many others)

=====

**STEP 1:**

CM -> Settings -> Custom Shader Patch -> Weather FX

Turn OFF: USE SEASONAL ADJUSTMENT

**STEP 2:**

CM -> Settings -> CSP -> TRACK ADJUSTMENT -> Track Extras:

Turn OFF Allow seasonal adjustment!

2 YOU REALLY LIKE SEASONAL ADJUSTMENTS

=====

**STEP 1:**

CM -> Settings -> Custom Shader Patch -> Weather FX

Turn ON: USE SEASONAL ADJUSTMENT

Turn OFF: If date is not set, use original sun trajectory

**STEP 2:**

CM -> Settings -> CSP -> TRACK ADJUSTMENT -> Track Extras: Allow seasonal adjustment

**STEP 3:**

CM -> Drive Tab -> Wheater: SOL (if you use SOL) and under Track: AUTO (set by wheather).

DON'T turn on real conditions or ideal conditions
